Prior to attending architecture school at Carnegie Mellon, I lived in Chicago where I completed my junior and senior year. Coming from San Francisco I immediately was taken by the rich architectural heritage of Chicago. I am an avid soccer player, barber and street artist. My current architectural interests are focused around digital fabrication techniques, the role of sketching in architecture, and further examining the materiality of a building in terms of how it affects the spatial and atmospheric qualities of the place.

Education

Carnegie Mellon School of Architecture | 2016-2021
Pursuing a Bachelor's Degree
